

ZNZ Translational Minisymposium on Stroke Research

Wednesday, Jan 29th 2025, 16:00 – 19:00
ETH Zurich, Building ETZ, Room E8 at Gloriastrasse 35, 8092 Zürich

We cordially invite interested basic scientists, clinicians and technology developers to this minisymposium. The goal is to identify challenges and roadblocks in current translational stroke research and suggest first ideas for possible solutions and new translational avenues. There will be the possibility to apply for small ZNZ grants to implement first steps.

The event will be chaired and moderated by Susanne Wegener and Mohamad El Amki.

The speakers will give a 2 min pitch (max. two slides) about their current research and how it could be related to cerebrovascular diseases (slide 1) and ideas/suggestions for a potential translational project (slide 2).

Based on results from this minisymposium or subsequent discussions, participants will have the opportunity to apply for translational seed grants (available 3 x 5k SFr.).

Program

4.00pm-4.05pm Mohamad El Amki (Intro + stroke/current experimental questions)

Pitch presentations:

4.05pm Cesar Nombela
4.08pm Quanyu Zhou
4.11pm Bruno Weber
4.14pm Andreas Spiegelberg
4.17pm Paul Wrede
4.20pm Christian Tackenberg
4.23pm Lore Legrand
4.26pm Marco Bacigaluppi
4.29pm Annika Keller
4.32pm Beatriz Achón Buil

4.35 – 5.15 Coffee break

5.15pm-5.20pm Susanne Wegener (stroke, current clinical questions)

Pitch presentations:

5.20pm Roger Gassert
5.23pm Candela Diaz
5.26pm Michael Rappleye
5.29pm Aiman Saab
5.32pm Giulio Biciato
5.35pm Rebecca Zoe Weber
5.38pm Martin Schwab
5.41pm Nora Rentsch
5.44pm Tian Jin
5.47pm Jorn Fierstra

5.50pm Summary – brainstorming – funding opportunities (Wolfgang/ Susanne) + discussion (all)
6.00pm Matchmaking Aperó
